a little about us.

Novo Farms is a privately owned Trinidad based company operating in the food manufacturing sector.

It is a division of Novo International where our main focus is agro processing with an aim to support customers and businesses with convenient access to a healthy lifestyle using locally grown produce.

Novo Farms takes a very proactive approach to food safety and implementing international standards and best practices when it comes to the quality and value of our product line.

Our Company Vision:

To improve the lives of our customers by ensuring innovation drives the products and solutions we offer.

It is our intention to be an active member of the agricultural ecosystem that pushes the industry to the next level and as such our manufacturing warehouse is equipped with the highest standard of machinery ensuring the final product is consistent when it comes to freshness and cleanliness. We believe food should be consumed as naturally as it is grown. You will not find any harmful additives or preservatives in our distribution chain.

With this overachieving philosophy, we will directly play our part in achieving the sustainable goals as identified by the United Nations.

Farms

warehouse operation.

Novo Farms holds the proper food manufacturing practices on a pedestal as all employees follow the Good Manufacturing Practice (GMP) regulation. The facility is washed and sanitized daily, and employees follow the mandatory sanitization processes once entering the warehouse.

sanitization is mandatory

what we offer.

Our products are offered under our commercial LIFE brand.

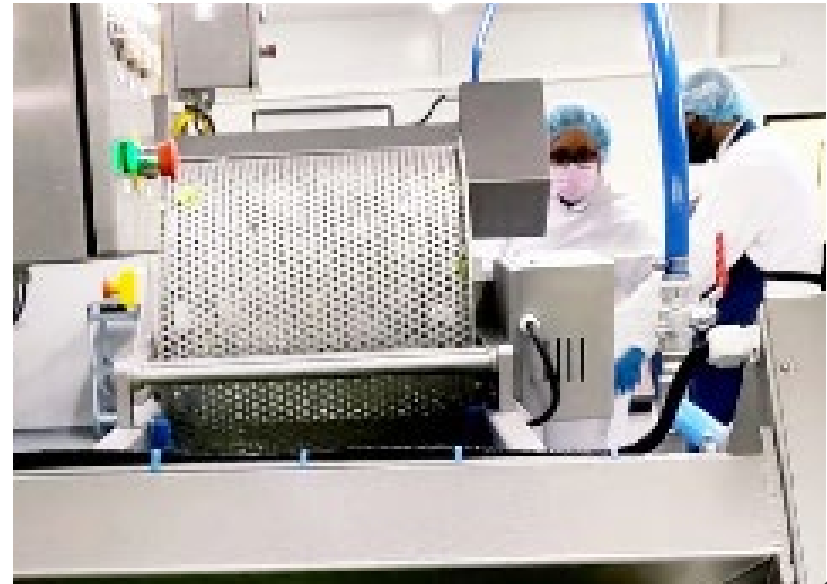

LIFE, is about using innovation to supply the essentials in a manner that will help make your life easier. We seek to provide new and unique solutions for 'the new normal' and the many global challenges that face us. LIFE remains environmentally conscious, utilizing what we have naturally and reducing the waste footprint of consumption. At LIFE we believe there is a need to build and support communities, strengthen connections and improve the overall quality of life.

We provide processed local produce such as vegetables, leafy greens, root crops and fruits. Additionally, we sell Smart Garden Units that make growing your own food a hassle free process and water units that allow you to always have access to natural alkaline water.

Fast, convenient and affordable are the keywords we add to healthy living. Our food manufacturing line reduces the food prep time for both large scale operations as well as the individual at home.

Trust us when we say we have a lot of exciting products to be revealed, some of which are new to Trinidad and Tobago!
